

The background is a solid dark blue. Scattered across the upper half are numerous short, horizontal lines in various colors: white, yellow, cyan, and magenta. These lines vary in length and are positioned at different heights and horizontal locations, creating a sense of movement or digital noise. In the lower-left quadrant, there is a dark blue rectangular box containing white text. Below this box, a single white horizontal line is visible.

## (( interactive luminous objects collection ))

The Meduse Design presents its new collection of the “Meduse Lights” interactive luminous objects with a series of innovative functions. The extraordinary design of this collection is based on organic shaping when the soft Lycra lampshade is stretched over the inner wire frame. The stately look of these luminous sculptures reflects the genius of nature motives of the vegetable kingdom, grandiosely executed.

On the other hand, the technical aspects of this collection draw on the latest technology of the 21st century: The bottom luminous module is designed on the basis of the latest technologies of top high-luminous LED diodes. The microprocessor-controlled system of optical synthesis allows user-friendly setting of an endless number of light shades within the whole colour spectrum. The module is also provided with some other interesting functions: users may select a specific colour range, in which colours can be mingling at a random pace. The audio input allows to enjoy the captivating rhythmic iridescence reacting to your favourite music. Thus, the “Meduse Lights” collection interactively gets users involved in changing the final image according to their mood with the remote control.
