((forged interior accessories collection))

We are proud to present a new collection of interior accessories from Meduse Design. Our collection is made from fire-moulded high-quality stainless steel bearing the touch of the unique Meduse Design smithcraft. Decorative interior accessories of this collection stem from an outstanding concept balancing between applied arts and interior sculpture.

Our production is not machine-made; all artifacts are created using traditional smithcraft with great dedication to detail: just forge, hammer and anvil involved. Thanks to this approach each piece is original and authentic, although originating in one design idea. Each product bears a Meduse Design touchmark and a serial number underlining its uniqueness.

This luxurious collection evolves from the smithcraft tradition, which has been continuously developing in our country since the early Middle Ages. However, we progressively shape the tradition in accordance with our contemporary lifestyle, design and modern architecture.
